

14 SMTP Settings - B2C White Label Travel Portal

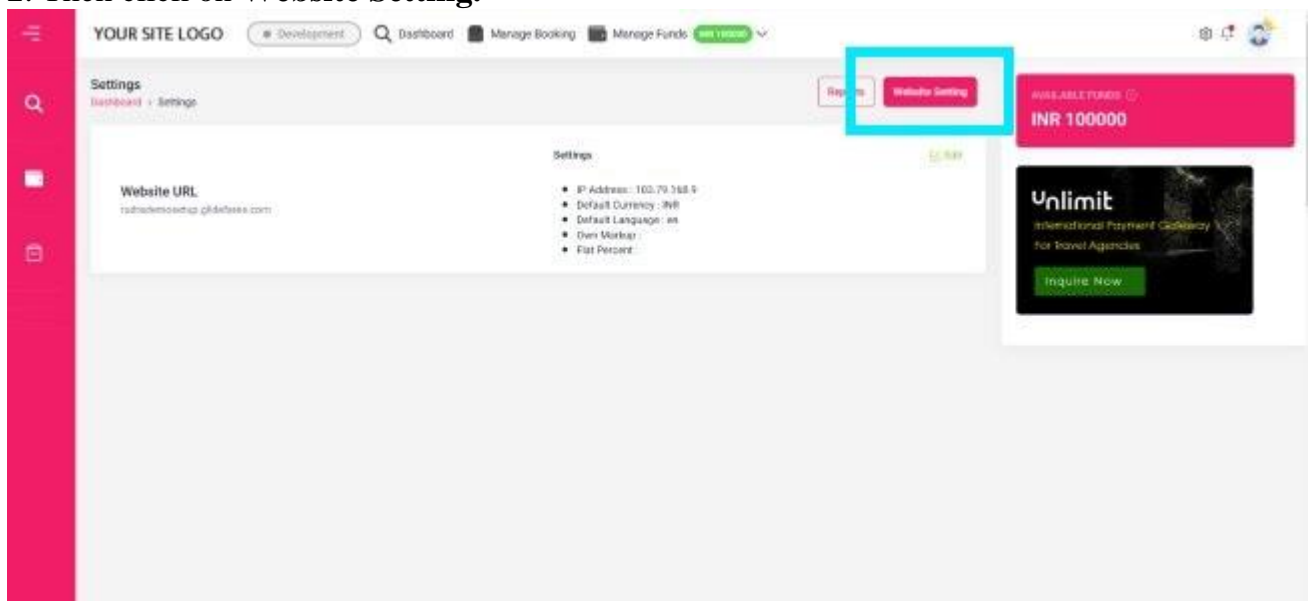

Send the transactional emails (ie. registration and booking emails) through your business email (ie. no-reply@yourwebsite.com).

- You can obtain your SMTP Settings from your provider's dashboard (ie. Godaddy, Bluehost, Hostgator etc)

1. Login to your back office and navigate to **Settings**.

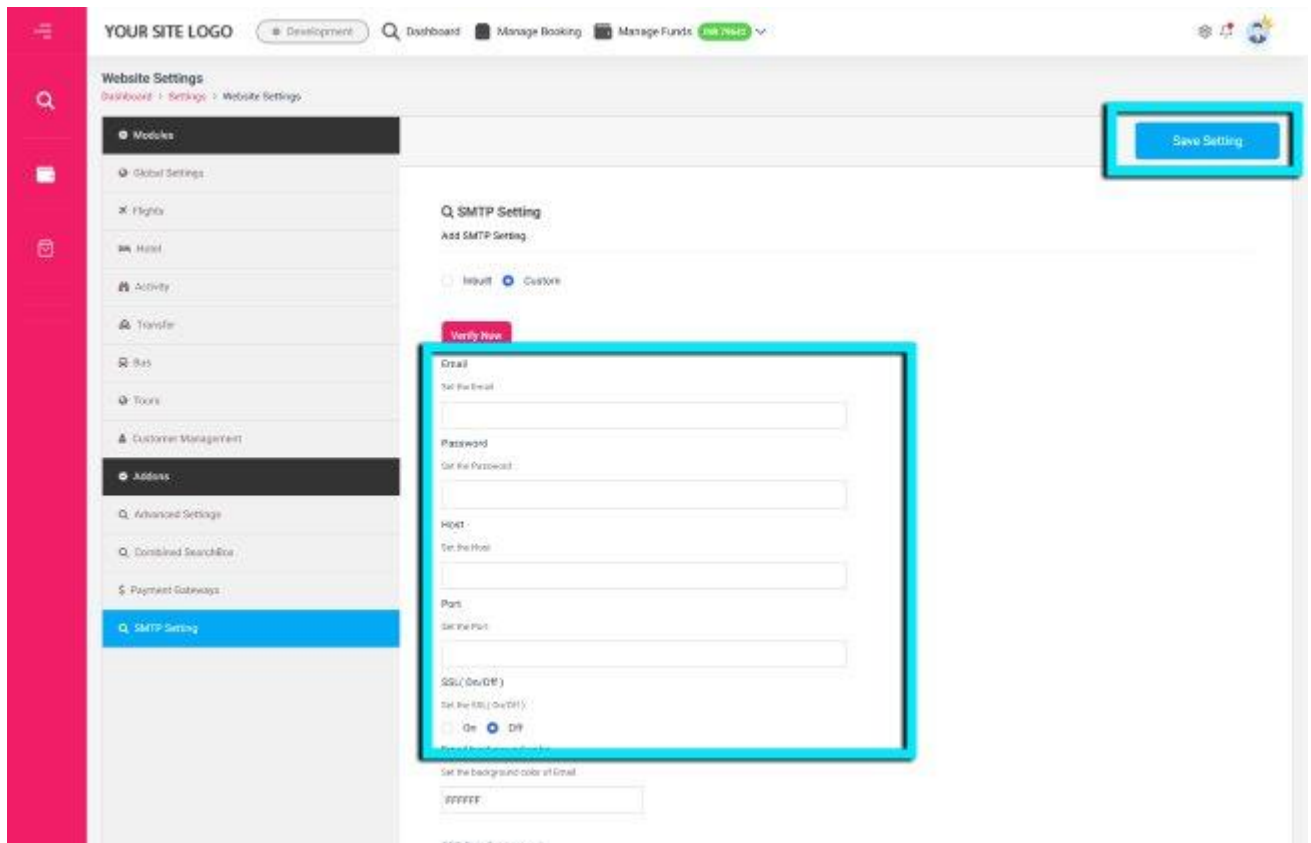

2. Then click on **Website Setting**.

3. Click Custom **Custom** option button.

The screenshot displays the 'Website Settings' interface. On the left, a sidebar menu lists various settings categories, with 'SMTP Setting' highlighted in a blue box. The main content area is titled 'SMTP Setting' and includes a sub-section 'Add SMTP Setting' with radio buttons for 'Inbuilt' and 'Custom', where 'Custom' is selected. Below this are several form fields: 'Email' (with a 'Verify Now' button), 'Password', 'Host', and 'Port'. There are also sections for 'SSL (On/Off)' with 'Off' selected, 'Email background color' (set to 'FFFFFF'), and 'PDF Strip Background' (set to 'F11D06').

4. Enter your SMTP details and click **Save Setting**.

5. If your SMTP settings are correct and not restricted by your provider. Your customers should now be receiving emails through your business email.

- **Set the Email:** Sender email id that you wish to send emails from (ie. no-reply@yoursite.com)
- **Password:** Password of the email id
- **Host:** SMTP Host of your email exchange (ie. smtp.yourwebsite.com)
- **Port:** Port can be 465 or 995
- **SSL:** Switch the SSL on and off depending on your
- **Enable background color:** Give your email templates a base color, in case if your logo is white or transparent.

- **PDF Strip background:** Match the green strip color (in E-Tickets and E-Vouchers PDF) with your website color combination
