

3 Load Your Funds Instantly and Securely Online

Recharge your wallet through Wire Transfer or Online through Debit or Credit Card. These funds will be used for instant settlement purposes

You receive live inventories and availabilities from GDS, Bedbanks and OTAs. You can receive the markedup payment from your customers straight into your bank account through your payment gateway. You can then book and get the ticket issued from which ever supplier you work with. But, if you want the bookings to happen on a real time basis and let customers receive the E-Vouchers and E-tickets instantly on the confirmation page, a floating deposit with Lourdes travel technology has to be maintained. This floating balance is used for the real time settlements with the GDS and suppliers. Following is how you can load funds in your floating balance wallet.

- You are free to decide the floating balance

1. Login to your back office and navigate to **Manage Funds > Add Funds**

2. If you wish to load funds through Wire Transfer. You can deposit the amount in the bank account in the right and submit the form with the deposit details.

The screenshot displays a web application interface for an NPS/NFT form. The form is highlighted with a red border and contains the following fields:

- Deposit Type* (Dropdown menu)
- Amount (Text input)
- Bank Name* (Text input)
- Bank Branch* (Text input)
- Payment Reference (Text input)
- Proof of Payment (Text input)
- Remarks (*Must include your company name) (Text input)

A 'Bank Details' popup is also visible, showing the following fields:

- Bank (Text input)
- A/C Number (Text input)
- A/C Holder Name (Text input)
- Branch Name (Text input)
- Account Type (Text input)
- NIFT/NRSC (Text input)
- SWIFT Code (Text input)

The interface includes a navigation bar with 'YOUR SITE LOGO', 'Development', 'Dashboard', 'Manage Booking', and 'Manage Funds' (with a balance of INR 100000). A sidebar on the right shows 'AVAILABLE FUNDS: INR 100000' and an 'Unlimit' advertisement.

Once the transaction is passed, your wallet gets credited instantly.
